MEMORANDUM FOR:

[redacted]
Deputy to the DCI for the
Intelligence Community

FROM:

[redacted]
SA/D/DCI/IC

SUBJECT:

News Items from Department of Justice

1. [redacted] said that Mr. Levi testified in open session before the Bayh Subcommittee this morning regarding the electronic surveillance bill. He said the subcommittee members were more business-like and less "preaching" than in the closed session on Wednesday. The exception to this was Senator Case (who was not present on Wednesday). He said that Senator Bayh subsequently left his chair and held a whispered conversation with Senator Case, whereupon he terminated his discussion. Doug also said that Morton Halperin was in the audience and, throughout the hearing, was busily writing questions which were delivered through cooperating staff members to be used by the Senators in questioning Mr. Levi. On balance, [redacted] called it a good session.

2. Mike Ullman of Justice advised that discussions with Representative Moss' staff have succeeded in having the AT&T subpoena held in abeyance until 21 July. If their requirements are satisfied by Justice and the FBI prior to that date, the subpoena will be withdrawn.
